

UmbracoSocialPluginAdapters

UmbracoSocialPluginAdapters adds Facebook and Twitter adapters for the [jQuery Social Stream Plugin](#) to your site!

The following appSettings need to be defined for the feeds to work:

- SocialPlugin_FacebookAppId
- SocialPlugin_FacebookAppSecret
- SocialPlugin_TwitterConsumerKey
- SocialPlugin_TwitterConsumerSecret

It is also necessary to set the correct URLs in the feed configuration in JavaScript, e.g.:

```
twitter: {  
    id: 'some_handle',  
    url: '/umbraco/UmbracoSocialPluginAdapters/Twitter/Get'  
},
```
